INTEGRATIONS: UNIFIED SECURITY SOLUTIONS

COMMUNICATE QUICKLY AND EASILY, WITH MILESTONE XPROTECT®

- Best-in-class partnership combines Zenitel's crystal-clear audio with Milestone's flexible, open-platform video management.
- Complete situational awareness via simultaneous live audio and video, managed directly from XProtect, will mitigate security risks and enable better decision making and faster response times.
- A 360-Degree View: Multiple video streams displayed during critical conversations create a complete picture of the caller and their surroundings.
- Integration options accommodate small systems to enterprise, scaling over time as security requirements evolve
- Intelligent Communication ensures that users can hear, be heard, and be understood in any situation, providing a voice to Milestone's Video Management System.

BECAUSE

when communication is critical

VINGTOR  STENTOFON

INTEGRATED COMMUNICATIONS AT YOUR FINGERTIPS

Intelligent Communication is driven by Intelligent Integration. With the open XProtect® video management platform, audio becomes intelligent by seamlessly integrating voice communications in your video management workflow.

VERIFY VISITOR IDENTITY

Provide dual identity verification through both visual and audio communication.

CALL WITH A CLICK

Initiate intercom calls to any device from the System Monitor dashboard.

MANAGE WAITING CALLS

Easily view calls waiting to be answered and their associated video from within XProtect Smart Client.

XProtect®

GRANT ACCESS

Customizable function buttons allow door opening and other actions from within XProtect Smart Client.

SUPERVISE AND MONITOR

See and verify the status of each intercom device.

QUICK AND EASY SET-UP

Auto-discovery and drag and drop configuration saves time and money.

Milestone Systems is a leading provider of open platform video management software

ADVANTAGES OF THE INTEGRATIONS WITH XPROTECT®:

- Intuitive use interface enables easy call queue management and one-click connection of calls direction from XProtect Smart Client.
- Linkage of multiple video streams with live intercom calls provides enhanced video monitoring and communication to exterior entrances and interior secure doors.
- Association of up to 4 cameras for each intercom station provides complete situational awareness while communicating with visitors, vendors, and staff.
- Quick and easy set-up: the Zenitel plug-in auto-discovers all Zenitel devices, which are then associated with the desired cameras through an intuitive drag-and-drop interface.
- View and record high-definition video from Zenitel's TCIV+ video intercom through ONVIF-S, always or on motion.

ZENITEL COMMUNICATION PLATFORMS:

IC-EDGE This serverless communication system delivers seamless integration, unrivaled audio quality and ease of use, right out of the box.

ICX-AlphaCom Our scalable, server-based platform enables advanced communication management, integrated with security applications.

Accept incoming calls in user interface (UI)	✗ Only via Zenitel intercom station or soft client	✓ Requires Zenitel intercom station or soft client
Cancel incoming calls in user interface	✓	✓
Initiate calls to individual intercom stations from the UI	✓	✓
Customizable button setting	✗	✓
Open doors from the access control system	✓ Depends on which access control system	✓ Depends on which access control system
Recording & playback of station audio & video streams	✓	✓
Call history and intercom status on the system log	✓	✓

WHY ZENITEL?

Communication is critical in all areas of business; therefore, our expertise is focused on providing intelligent communication solutions that allow you to hear, be heard and be understood, every time. Zenitel systems interface with other security systems including CCTV, access control and alarm for a comprehensive security solution. Our primary system offering is within Public Address, Intercom and Radio. Our key markets include: Building

Security, Public Safety/Smart Cities, Transportation, Education, Prisons, Industrial Manufacturing, Healthcare, Retail, Energy and Maritime. Zenitel systems provide high availability, scalability, reliability, maintainability and cyber defensibility. By reducing hardware to a minimum, and keeping the benefits of centralized server management, organizations have more flexibility in scale and performance.
