

BUILDING SECURITY: IP AUDIO SOLUTIONS

PROVIDE A SECURE FACILITY

Keeping your employees and visitors protected is a key priority in commercial and public buildings. When you add our IP audio solutions to your building, it enhances security measures such as video and access control systems, by adding the ability to hear, be heard and be understood.

- Be in complete control with seamless integrations to your video management or access control system.
- Manage your visitors and maintain access control across the property.
- Secure your facility, people and assets.
- Facilitate efficient and clear on-premise communication.

APPLICATIONS AND BENEFITS

When you add our IP audio solutions to your building, it becomes interactive. Security guards can instantly speak to people they see on the video system, regardless of distance. If the person is lost or simply needs assistance, it is easy for an operator in charge to assist them directly.

Security staff can also interact to prevent unwanted situations from developing. By combining access control and cameras with our clear, powerful audio solutions, Zenitel makes it simple to welcome, guide, help or warn people anywhere in the building or on the premises.

See how you can add audio to your security mix!

Remote Control Room & Integrations

BE IN CONTROL

We seamlessly integrate with video management systems and access control systems, so you can enhance other systems with best-in class IP audio solutions.

IC-EDGE

This serverless communication system delivers seamless integration, unrivaled audio quality and ease of use, right out of the box.

ICX-AlphaCom

Our scalable, server-based platform enables advanced communication management, integrated with security applications.

SIP

All our devices support SIP, enabling them to be used in any VoIP communication platform that supports SIP.

Integration partners:

Evacuation, Area of Refuge

Communicate to and from hallways, common areas, meeting rooms, etc., to provide employees and visitors with important information quickly and clearly.

Loading Docks/Side Door

Provide secure and easy access to the premises for delivery drivers or other authorized personnel.

Elevator Communication

Instant communication with an operator when assistance is needed. An output for Hearing loops is available.

Roaming guard

Direct communication line to security guard patrols.

PA for General Info and Incident Handling

Provide general information throughout the building or to specific sections. Assist in responding to incidents with both pre-recorded & manual announcements.

Access to Restricted Areas

Safeguard restricted areas. Communicate with one click. Touchless sensor accessory available.

Perimeter Management

Protect your assets and avoid loitering by challenging unauthorized persons anywhere on your property.

Help Point

In case of emergency or need for assistance.

Reception

Answer calls or make public announcements. Forward calls to your mobile phone via our Zenitel Mobile app.

Visitor Management at Entrances and Barriers

Frictionless connectivity, so you can identify visitors via both audio and video and guide them to where they need to be.

PRODUCT SUGGESTIONS:

CONTROL ROOM MASTER

This advanced CRM sports a large 4 x 20-character alphanumeric display w/ backlight, full keypad, up to 52 programmable direct-access keys (DAK), handset, sensitive mic and powerful 1W loudspeaker. It offers automatic switching of speech direction with manual override.

VIDEO INTERCOM & TOUCHLESS SENSOR

Mitigates security risks faster than ever, via a unique combination of exceptional video, voice and powerful audio amplification for announcements. Use a Touchless Sensor accessory to activate calls with a gesture.

TURBINE IP & SIP INTERCOMS

Offers unrivaled sound quality, security and ease of use, w/ multiple design options. Perfect for doors, barriers, and gates. Designed to withstand treacherous situations including extreme fluctuations in temperature, vandalism, and noisy, dirty, and dusty environments.

IP DESKTOP SOLUTIONS

Enhances your communication with connected stations featuring video capabilities and camera. Equipped with a 7" touchscreen and real-time HD video telephony, built-in Wi-Fi, Bluetooth, and more. Zenitel Mobile allows you to respond to visitors while on the move. Or, use our VS client to add master station features to your PC.

IP SPEAKERS

Allows you to monitor and address speakers individually and add speakers easily. In-speaker amplifier means no central amplifier needed, allowing for a highly scalable system. This integrated 10W Class D amplifier utilizes PoE to deliver our crystal-clear audio quality.

ICX-ALPHACOM PLATFORM

Enjoy advanced intercom functionality such as the ability to prerecord messages on your server for emergency communication and record intercom calls at any connected station. Seamlessly integrates with market-leading access control, surveillance and communication systems.
