zenitel
because communication is critical

INTEGRATED VOICE COMMUNICATION FOR CORRECTIONAL FACILITIES

Prisons and detention centers demand a reliable and high-quality communication system to be available around the clock. Our solutions are designed to enable guards and other personnel to work efficiently to protect life and facilities and provide the level of security required for safe operations.

With our VoIP intercom and Public Address system, you can provide clear and dependable communication across an entire correctional facility.

- Maintain crystal clear audio even in a noisy or unforeseen event.
- Utilize the latest in VoIP technology with full monitoring and high availability.
- Advanced station technology fit for any environment.
- Protect your staff, inmates and visitors with targeted communication.
- Hear, be heard and be understood in any situation.

APPLICATIONS AND KEY BENEFITS

zenitel

Explore some of our key features on how to add intelligent communication with crystal clear audio to your correctional facility solution.

CELL COMMUNICATION AND MONITORING

Vandal resistant intercoms with audio and visual call identification. Supports scream alarm, tamper alarm, audio monitoring and entertainment.

DOORS AND GATES

Communicate with inmates and control access to restricted areas, gates and airlocks.

CONTROL ROOM

Master intercoms for standalone and GUI integration. Receive calls, make announcements, process alarms and events, and monitor radio traffic.

CORE SYSTEM FEATURES

Dedicated and custom system features designed for the Correctional environment. Optional integration with access control systems, video management systems and physical security information management.

OPERATIONAL COMMUNICATION FOR CUSTODIAL AND ADMINISTRATIVE STAFF

Make calls between officers, and administrate staff using intercoms, desktop stations or fully embedded softclients.

PUBLIC ADDRESS

General announcements divided into multiple zones. Broadcast live or prerecorded messages to cells, sections, and common areas inside and outside the prison for information, warnings and evacuation purposes.

ROAMING GUARDS

Interface to mobile radio for talk groups and make private calls to roaming guards using SIP.

CLINIC/INFIRMARY

Purpose built medical grade intercom for communication to staff.

COMMON AREA

Monitor microphones and interface to CCTV systems to provide audio and visual communication system.

NON-CONTACT VISITATION

Talk through glass solution for visitor booths, remotely monitored and controlled by supervisor.

RECOMMENDED PRODUCTS:

ICX-ALPHACOM PLATFORM

ICX-AlphaCom seamlessly integrates with market-leading prison surveillance, access control, and communication systems. You will have advanced intercom functionality such as the ability to prerecord messages on your server for emergency communication and record intercom calls at any connected station.

TURBINE IP & SIP INTERCOMS

Our Turbine IP Intercom Stations are designed to withstand treacherous situations including extreme fluctuations in temperature, vandalism, noisy, dirty, and dusty environments. The series offer unrivaled sound quality, security and ease of use, with multiple design options. Perfect for doors, barriers, and gates.

TURBINE IP MINI INTERCOMS

The TMIS-2 is our robust, vandal-resistant intercom designed specifically for prisons and other high-security environments. The stations provide crystal-clear audio thanks to powerful speakers, automatic volume adjustment, and background noise cancellation.

IP DESKTOP OPTIONS

The ITSV-3 IP Touch Station is a video desktop intercom equipped with a 7"touchscreen. It features video capabilities and a camera to enhance your communication with connected stations. Optionally, use our SoftClient to add master station features to your PC.

IP SPEAKERS

Our IP Speakers features a 10W Class D amplifier, utilizing all the power that PoE can deliver – more than 116dB, depending on the signal input. With IP, the system is able to monitor and address each speaker individually. With the amplifier in the speaker itself, the need for a central amplifier unit with conventional speaker loops is eliminated, making the system highly scalable. Additional speakers can be easily added.

CUSTOMIZED INTERCOM KIT

The TKIS-2 VoIP Intercom Module can be used to create custom intercom stations based on local standards and requirements.

WHY ZENITEL?

Communication is critical in all areas of business; therefore, our expertise is focused on providing intelligent communication solutions that allow you to hear, be heard and be understood, every time. Zenitel systems interface with other security systems including CCTV, access control and alarm for a comprehensive security solution. Our primary system offering is within Public Address, Intercom and Radio. Our key markets include: Building Security, Public Safety/Smart Cities, Transportation, Education, Prisons, Industrial Manufacturing, Healthcare, Retail, Energy and Maritime. Zenitel systems provide high availability, scalability, reliability, maintainability and cyber defensibility. By reducing hardware to a minimum, and keeping the benefits of centralized server management, organizations have more flexibility in scale and performance.
