

UNIVERSITY CAMPUS ENTRY

How to Control Vaccinated and Unvaccinated Student Entry on Campus

Currently, many New Zealand Universities have an open uncontrolled entry onto the campus and into the faculty buildings.
From 2022, Universities across the country are implementing a vaccination mandate as a condition of entry to campus facilities.

Open Uncontrolled University Entrances

With an uncontrolled open entry, how can this be effectively managed?

Here is a simple process Universities can implement across the campus to ensure mandated rules are being followed for the health and safety of students and staff.

Step 1

- Students show their proof of vaccination to the student services reception or concierge upon orientation day or on their return to study.

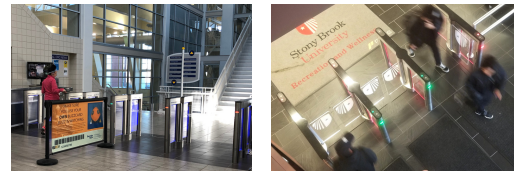

Register Proof of Vaccination to activate ID card

University staff acknowledge the proof of vaccination against the students details and activate their student identification card.

Step 2

- Students present their student identification card to the Speedgates located at the faculty building entrance.
The Speedgates will grant access to students and staff who present a valid ID card.

Access the Faculty Building via the entry Speedgates

Students who have yet to show evidence of vaccination, will not have a valid ID card to allow them access at the Speedgates.

When entry control solutions are part of the entry process, it gives the organisation control over who can and cannot enter the facility. Strategic layouts can be used to manage the flow and direction of student traffic. With each student and staff member presenting their ID, University Access Control Systems can identify who is onsite at any one time. Speedgate have flexible design and customisation options to suit the requirements, from architectural to security, to blend seamlessly into any environment and enhance health, safety, and security.

REFERENCES

Custom Technology Systems have already implemented Speedgates for Student and Staff entry control at MIT Tech Park. Many Universities worldwide are already using Speedgates to control student entry on campus. From learning areas, libraries, cafeterias, rec centres and more. Speedgates provide a number of Health, Safety, and Security benefits throughout the campus.
